

The learning itself is not online but the language program is installed into the learners laptop. Each language contains 153 lessons per level. Laptop installation gives the added advantage in that the learner can learn the language while in the office or at home and at his/her own time and speed. If the learner travels with his/her laptop he/she can learn in the hotel room and can consult the program if the language being learnt is the one spoken in the host country. The program can also be sent online.
